Cancer Letters, 62 (1992) 277 – 280
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 62

2-Amino-3,4-dimethylimidazo[4,5-*f*]quinoline, Ha-*ras* mutation, forestomach squamous cell carcinoma, 115
2-Acetylaminofluorene, benzo[*a*]pyrene, 4-aminobiphenyl, human, rat, hepatocytes, DNA adducts and ^{32}P-postlabeling assay, 87
Acute lymphoid leukemia, acute myeloid leukemia, manganese-superoxide dismutase, 211
Acute myeloid leukemia, acute lymphoid leukemia, manganese-superoxide dismutase, 211
Aflatoxin B_1, penta-acetyl geniposide, genotoxicity, cytotoxicity, 233
Alprazolam, stress, mammary tumor virus, immunity, anxiolytics, 185
4-Aminobiphenyl, 2-acetylaminofluorene, benzo[*a*]pyrene, human, rat, hepatocytes, DNA adducts and ^{32}P-postlabeling assay, 87
Angiogenesis, ovarian cancer, ascitic fluid, macrophages, endothelial cells, 153
Anti-cancer antibody, human monoclonal antibody, antibody dependent cell-mediated cytotoxicity, tumor immunity, cytotoxicity, effector cell, 179
Antibody dependent cell-mediated cytotoxicity, human monoclonal antibody, anti-cancer antibody, tumor immunity, cytotoxicity, effector cell, 179
Antiproliferative effect, transformed cell lines, retinoids, cytokines, combination therapy, 167
Anxiolytics, stress, mammary tumor virus, immunity, alprazolam, 185
Asbestos, HL-60 cells, cell differentiation, protein kinase C, radicals, 225
Ascitic fluid, ovarian cancer, macrophages, endothelial cells, angiogenesis, 153
Autorcine loop, insulin-like growth factor I, suramin, differentiation, human colon cancer cells, 23

BaP 7,8-DHD and BPDE metabolism, Chinese medicinal herbs, *Oldenlandia diffusa*, *Scutellaria barbata*, DNA binding, mutagenesis, scavenging, 123
Benzo[*a*]pyrene, 2-acetylaminofluorene, 4-aminobiphenyl, human, rat, hepatocytes, DNA adducts and ^{32}P-postlabeling assay, 87
BOP, cholecystokinin, Syrian golden hanster, pancreatic neoplasm, DNA aklyation, 251
Burns, tumorigenicity, cultured keratinocytes, serum-free medium, cultured skin grafts, skin carcinoma, 141

c-*myc*, colon, oncogene, proto-oncogene, induction and differentiation agents, 95
Carbaryl, mouse skin, carcinogenicity, cocarcinogenicity, 133
Carcinogenicity, carbaryl, mouse skin, cocarcinogenicity, 133
Cashew nut shell oil, papilloma, mouse skin, 149
cDNA, laminin, receptor, human, lung cancer, 199
Cell cycle, oncogenes, mastocytes, interleukin-3, flow cytometry, 243
Cell differentiation, HL-60 cells, protein kinase C, radicals, asbestos, 225
Chinese medicinal herbs, *Oldenlandia diffusa*, *Scutellaria barbata*, BaP 7,8-DHD and BPDE metabolism, DNA binding, mutagenesis, scavenging, 123
Chlorination by-products, trichloroacetonitrile, halogenated acetonitriles, DNA adduct, protein adduct, 1
Cholecystokinin, Syrian golden hanster, pancreatic neoplasm, DNA aklyation, BOP, 251
Cisplatin resistance, thaliblastine, collateral sensitivity, rat ovarian tumor cell lines, 173
Cocarcinogenicity, carbaryl, mouse skin, carcinogenicity, 133
Collateral sensitivity, thaliblastine, cisplatin resistance, rat ovarian tumor cell lines, 173
Colon, c-*myc*, oncogene, proto-oncogene, induction and differentiation agents, 95
Combination therapy, antiproliferative effect, transformed cell lines, retinoids, cytokines, 167
Cultured keratinocytes, tumorigenicity, serum-free medium, cultured skin grafts, burns, skin carcinoma, 141
Cultured skin grafts, tumorigenicity, cultured keratinocytes, serum-free medium, burns, skin carcinoma, 141
Cytokines, antiproliferative effect, transformed cell lines, retinoids, combination therapy, 167

Cytotoxicity, human monoclonal antibody, antibody dependent cell-mediated cytotoxicity, anti-cancer antibody, tumor immunity, effector cell, 179
Cytotoxicity, penta-acetyl geniposide, genotoxicity, aflatoxin B_1, 233
Cytotoxic effect, HeLa, Raji, flavonoids, polyphenols, fat-soluble vitamins, 217

Dietary components, fecapentaenes, fecal mutagenicity, vegetarians, omnivores, 11
Differentiation, insulin-like growth factor I, suramin, autorcine loop, human colon cancer cells, 23
Distribution, naticarcinogenesis, protease inhibitor, 191
DNA adduct, trichloroacetonitrile, halogenated acetonitriles, chlorination by-products, protein adduct, 1
DNA adducts and ^{32}P-postlabeling assay, 2-acetylaminofluorene, benzo[*a*]pyrene, 4-aminobiphenyl, human, rat, hepatocytes, 87
DNA aklyation, cholecystokinin, Syrian golden hanster, pancreatic neoplasm, BOP, 251
DNA binding, Chinese medicinal herbs, *Oldenlandia diffusa*, *Scutellaria barbata*, BaP 7,8-DHD and BPDE metabolism, mutagenesis, scavenging, 123
Drug transport, multidrug resistance, P-glycoprotein, protein kinase C isoforms, 69

Effector cell, human monoclonal antibody, antibody dependent cell-mediated cytotoxicity, anti-cancer antibody, tumor immunity, cytotoxicity, 179
Endothelial cells, ovarian cancer, ascitic fluid, macrophages, angiogenesis, 153

F-344, spontaneous, neoplams, tumor, rat, rodent, 49
Fat, vitamin A, lung carcinogenesis, *N*-nitrosodiethylamine, 57
Fat-soluble vitamins, cytotoxic effect, HeLa, Raji, flavonoids, polyphenols, 217
Fecal mutagenicity, fecapentaenes, dietary components, vegetarians, omnivores, 11
Fecapentaenes, fecal mutagenicity, dietary components, vegetarians, omnivores, 11
Flavonoids, cytotoxic effect, HeLa, Raji, polyphenols, fat-soluble vitamins, 217
Flow cytometry, oncogenes, mastocytes, cell cycle, interleukin-3, 243
Forestomach squamous cell carcinoma, 2-amino-3,4-dimethylimidazo[4,5-*f*]quinoline, Ha-*ras* mutation, 115

Gene transfer, immunotherapy, interleukin-2, interleukin-4, 257
Genotoxicity, penta-acetyl geniposide, cytotoxicity, aflatoxin B_1, 233

Ha-*ras* mutation, 2-amino-3,4-dimethylimidazo[4,5-*f*]-quinoline, forestomach squamous cell carcinoma, 115
Halogenated acetonitriles, trichloroacetonitrile, chlorination by-products, DNA adduct, protein adduct, 1
HeLa, cytotoxic effect, Raji, flavonoids, polyphenols, fat-soluble vitamins, 217
Hepatocytes, 2-acetylaminofluorene, benzo[*a*]pyrene, 4-aminobiphenyl, human, rat, DNA adducts and ^{32}P-postlabeling assay, 87
HL-60 cells, cell differentiation, protein kinase C, radicals, asbestos, 225
Human, 2-acetylaminofluorene, benzo[*a*]pyrene, 4-aminobiphenyl, rat, hepatocytes, DNA adducts and ^{32}P-postlabeling assay, 87
Human, laminin, receptor, lung cancer, cDNA, 199
Human colon cancer cells, insulin-like growth factor I, suramin, autorcine loop, differentiation, 23
Human monoclonal antibody, antibody dependent cell-mediated cytotoxicity, anti-cancer antibody, tumor immunity, cytotoxicity, effector cell, 179

Immunity, stress, mammary tumor virus, alprazolam, anxiolytics, 185
Immunotherapy, gene transfer, interleukin-2, interleukin-4, 257
Induction and differentiation agents, c-*myc*, colon, oncogene, proto-oncogene, 95
Insulin-like growth factor I, suramin, autorcine loop, differentiation, human colon cancer cells, 23
Interleukin-2, immunotherapy, gene transfer, interleukin-4, 257
Interleukin-3, oncogenes, mastocytes, cell cycle, flow cytometry, 243
Interleukin-4, immunotherapy, gene transfer, interleukin-2, 257
Isothiocyanates, phenethyl isothiocyanate (PEITC), 6-phenylhexyl isothiocyanate (PHITC), tobacco-specific nitrosoamine, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK), 77

Labeling indices, magnesium hydroxide, methylazoxymethanol acetate, large bowel carcinogenesis, 43
Laminin, receptor, human, lung cancer, cDNA, 199
Large bowel carcinogenesis, magnesium hydroxide, methylazoxymethanol acetate, labeling indices, 43
Liver, serotonin (5-HT), tumour cells, phagocytes, lodgement, 83
Lodgement, serotonin (5-HT), tumour cells, phagocytes, liver, 83
Lung cancer, laminin, receptor, human, cDNA, 199
Lung carcinogenesis, vitamin A, fat, *N*-nitrosodiethylamine, 57

Macrophages, ovarian cancer, ascitic fluid, endothelial cells, angiogenesis, 153
Magnesium hydroxide, methylazoxymethanol acetate, large bowel carcinogenesis, labeling indices, 43
Mammary tumor virus, stress, immunity, alprazolam, anxiolytics, 185
Manganese-superoxide dismutase, acute myeloid leukemia, acute lymphoid leukemia, 211
Mastocytes, oncogenes, cell cycle, interleukin-3, flow cytometry, 243
Methotrexate pancreatic cancer somatostatin analog carrying cytotoxic radical somatostatin 263
Methylazoxymethanol acetate, magnesium hydroxide, large bowel carcinogenesis, labeling indices, 43
4,4′-Methylene bis(2-chloraniline) (MOCA), ornithine decarboxylase, 63
4-(Methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK), isothiocyanates, phenethyl isothiocyanate (PEITC), 6-phenylhexyl isothiocyanate (PHITC), tobacco-specific nitrosoamine, 77
Mezerein, SHE clonal transformation, tumor promoter, 159
Mouse skin, carbaryl, carcinogenicity, cocarcinogenicity, 133
Mouse skin, cashew nut shell oil, papilloma, 149
Multidrug resistance, drug transport, P-glycoprotein, protein kinase C isoforms, 69
Mutagenesis, Chinese medicinal herbs, *Oldenlandia diffusa*, *Scutellaria barbata*, BaP 7,8-DHD and BPDE metabolism, DNA binding, scavenging, 123

Naticarcinogenesis, distribution, protease inhibitor, 191
Neoplams, spontaneous, tumor, F-344, rat, rodent, 49
N-Nitrosodiethylamine, vitamin A, fat, lung carcinogenesis, 57

Oldenlandia diffusa, Chinese medicinal herbs, *Scutellaria barbata*, BaP 7,8-DHD and BPDE metabolism, DNA binding, mutagenesis, scavenging, 123
Omnivores, fecapentaenes, fecal mutagenicity, dietary components, vegetarians, 11
Oncogene, c-*myc*, colon, proto-oncogene, induction and differentiation agents, 95
Oncogenes, mastocytes, cell cycle, interleukin-3, flow cytometry, 243
Ornithine decarboxylase, 4,4′-methylene bis(2-chloraniline) (MOCA), 63
Ovarian cancer, ascitic fluid, macrophages, endothelial cells, angiogenesis, 153

P-glycoprotein, multidrug resistance, drug transport, protein kinase C isoforms, 69
Pancreatic cancer somatostatin analog carrying cytotoxic radical somatostatin methotrexate 263
Pancreatic neoplasm, cholecystokinin, Syrian golden hanster, DNA aklyation, BOP, 251
Papilloma, cashew nut shell oil, mouse skin, 149
Penta-acetyl geniposide, genotoxicity, cytotoxicity, aflatoxin B_1, 233
Phagocytes, serotonin (5-HT), tumour cells, liver, lodgement, 83
Phenethyl isothiocyanate (PEITC), isothiocyanates, 6-phenylhexyl isothiocyanate (PHITC), tobacco-specific nitrosoamine, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK), 77
6-Phenylhexyl isothiocyanate (PHITC), isothiocyanates, phenethyl isothiocyanate (PEITC), tobacco-specific nitrosoamine, 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK), 77
Polyphenols, cytotoxic effect, HeLa, Raji, flavonoids, fat-soluble vitamins, 217
Promotion, skin, tumor, sphingosine, 35
Protease inhibitor, naticarcinogenesis, distribution, 191
Protein adduct, trichloroacetonitrile, halogenated acetonitriles, chlorination by-products, DNA adduct, 1
Protein kinase C, HL-60 cells, cell differentiation, radicals, asbestos, 225
Protein kinase C isoforms, multidrug resistance, drug transport, P-glycoprotein, 69
Proto-oncogene, c-*myc*, colon, oncogene, induction and differentiation agents, 95

Radicals, HL-60 cells, cell differentiation, protein kinase C, asbestos, 225
Raji, cytotoxic effect, HeLa, flavonoids, polyphenols, fat-soluble vitamins, 217
Rat, 2-acetylaminofluorene, benzo[*a*]pyrene, 4-aminobiphenyl, human, hepatocytes, DNA adducts and ^{32}P-postlabeling assay, 87
Rat, spontaneous, neoplams, tumor, F-344, rodent, 49
Rat ovarian tumor cell lines, thaliblastine, cisplatin resistance, collateral sensitivity, 173
Receptor, laminin, human, lung cancer, cDNA, 199
Retinoids, antiproliferative effect, transformed cell lines, cytokines, combination therapy, 167
Rodent, spontaneous, neoplams, tumor, F-344, rat, 49

Scavenging, Chinese medicinal herbs, *Oldenlandia diffusa*, *Scutellaria barbata*, BaP 7,8-DHD and BPDE metabolism, DNA binding, mutagenesis, 123
Scutellaria barbata, Chinese medicinal herbs, *Oldenlandia diffusa*, BaP 7,8-DHD and BPDE metabolism, DNA binding, mutagenesis, scavenging, 123
Serotonin (5-HT), tumour cells, phagocytes, liver, lodgement, 83

Serum-free medium, tumorigenicity, cultured keratinocytes, cultured skin grafts, burns, skin carcinoma, 141
SHE clonal transformation, mezerein, tumor promoter, 159
Skin, tumor, promotion, sphingosine, 35
Skin carcinoma, tumorigenicity, cultured keratinocytes, serum-free medium, cultured skin grafts, burns, 141
Somatostatin analog carrying cytotoxic radical pancreatic cancer somatostatin methotrexate 263
Somatostatin pancreatic cancer somatostatin analog carrying cytotoxic radical methotrexate 263
Sphingosine, skin, tumor, promotion, 35
Spontaneous, neoplams, tumor, F-344, rat, rodent, 49
Stress, mammary tumor virus, immunity, alprazolam, anxiolytics, 185
Suramin, insulin-like growth factor I, autorcine loop, differentiation, human colon cancer cells, 23
Syrian golden hanster, cholecystokinin, pancreatic neoplasm, DNA aklyation, BOP, 251

Thaliblastine, cisplatin resistance, collateral sensitivity, rat ovarian tumor cell lines, 173
Tobacco-specific nitrosoamine, isothiocyanates, phenethyl isothiocyanate (PEITC), 6-phenylhexyl isothiocyanate (PHITC), 4-(methylnitrosamino)-1-(3-pyridyl)-1-butanone (NNK), 77
Transformed cell lines, antiproliferative effect, retinoids, cytokines, combination therapy, 167
Trichloroacetonitrile, halogenated acetonitriles, chlorination by-products, DNA adduct, protein adduct, 1
Tumor, skin, promotion, sphingosine, 35
Tumor, spontaneous, neoplams, F-344, rat, rodent, 49
Tumorigenicity, cultured keratinocytes, serum-free medium, cultured skin grafts, burns, skin carcinoma, 141
Tumor immunity, human monoclonal antibody, antibody dependent cell-mediated cytotoxicity, anti-cancer antibody, cytotoxicity, effector cell, 179
Tumor promoter, mezerein, SHE clonal transformation, 159
Tumour cells, serotonin (5-HT), phagocytes, liver, lodgement, 83

Vegetarians, fecapentaenes, fecal mutagenicity, dietary components, omnivores, 11
Vitamin A, fat, lung carcinogenesis, *N*-nitrosodiethylamine, 57

Cancer Letters, 62 (1992) 281 – 282
